Writing Team Outline for Program Outcomes
EE Review Report

Writing Team Members

- Stephen Hancock (Team leader)
- Glade Tew
- Ray Thomas
- Karen Miller

I have a tentative outline. We will be dividing the report into four sections:
1. Our most serious progress and our greatest successes.
2. The differences between assessing what is convenient to assess and assessing what is most valuable, progress in this area and compromises that have been made.
3. How the requirements of outside accrediting bodies have impacted assessment efforts in departments.
4. Continuous improvement through assessment of program outcomes--Where is it happening and how much do we know about it.

Each of the team members will be writing one of these sections (about 2 pages) with input from those involved with assessment in many of the departments, and I will be integrating them into a whole. We will also have two sidebar stories highlighting two departments and their efforts in assessment and continual improvement, as long as they fit into the final document. There will probably be a short conclusion indicating where we need to go from here.
